Revitalizing Our Ravines: Community Workshop 2016

June 1, 12:30-6 pm, evening cocktail reception from 6-7:30 pm
Chicago Botanic Garden

Healthy ravines are beautiful landscapes that protect Lake Michigan's water and beaches, reduce property

erosion, and provide habitat for endangered and rare plants, spawning fish and migrating birds.

But without thoughtful action, our ravines could become dangerous, muddy ditches that erode property and increase pollution in Lake Michigan.

What to Expect

Hear from experts

Connect with ravine neighbors

Shape the future for ravines

Learn about homeowner ravine projects

Meet local landscape & restoration service providers

Enjoy free snacks, refreshments and evening cocktail reception

Register by May 22!
